

Four Cents Per Copy—\$2.00 Per Year

EAST BETHEL

Mr. and Mrs. John Howe were in South Paris one day last week. D. W. Dutton, who has been in the Rumford Community Hospital for the last two months, is expected to be home in a few days.

Mrs. Irving Kimball has returned to her home in Boston, after spending two weeks with her parents, Mr. and Mrs. John Holt.

Mr. and Mrs. Frothingham of Andover recently visited her sister, Mrs. Maggie Newton.

Mrs. Fred Howe has been sick and under the doctor's care, but is better now.

Mr. and Mrs. John Holt are enjoying a new radio which they have had installed in their home recently.

Mr. and Mrs. Olson are rejoicing over the birth of a son.

Mr. and Mrs. William Hastings and

children, Barbara and Billy, were Sunday guests of Mrs. Hastings' parents, Mr. and Mrs. Cole, of Greenwood.

The Planning Meeting of the East Bethel Farm Bureau was held recently at the Grange Hall. The forenoon was

taken up with local program, pictures on Kitchen Improvement and Poultry, with talk on subjects. At noon a square meal for health was served to over 40. In the afternoon election of leaders and project work was taken up.

In the Women's Division leaders are:
Chairman—Sadie Knight
Secretary—Gladys Tyler
Clothing—Cecile Reed
Home Management—Edith Howe
Foods—Grace Harris
Catholicism—Margaret

PROGRAM FOR 1939
 Jan. 30—Upholstering
 Feb. 14—Prep. of Milk—I
 Mar. 6—Prep. of Milk—II
 Apr. 6—Eggs at Any Meal
 May 2—Dressing the Children

June 19 Making Leather Pocket
looks
July Open
Aug. 22 Conditioning the Wardrobe
Sept. 18 Child Feeding—I
Oct. 17 Child Feeding—II
Nov. 6 Christmas Candy

Dec. - Open
MEN'S DIVISION
Chairman - Gray Bartlett
Secretary - Urban Bartlett
Farm Management and Poultry
Robert Hastings
Dairying - Ceylon Kimball

Soil testing and several other demonstrations are to be made.

PATENT OFFICE
SNOWED UNDER

Enough Devices Await Sanction to Occupy Staff for Six Years.

Washington.—Inventive minds in the nation have seldom, if ever, been so active as now, according to the records of the United States patent office of the Department of Commerce. The general trend continues toward conserving man power and adding to the comfort of humanity through new machines. So great is the activity among inventors at this time that the patent office is six years behind in its work. There are 111,737 applications, exclusive of trade-mark registrations, now pending, and officials say these alone would occupy the entire patent staff for six years. A more liberal attitude by congress toward enlarging the personnel in this governmental work is looked to as one solution of the problem of bringing the work up to date.

The division handling applications for patents on carbon chemistry processes, dyes, explosives and sugar and starch formulae, has been the most active in the past few months. It has 3,650 applications before it, the largest number pending in any division of the patent office work. This activity is attributed to the growth of the American industries mentioned since the World war.

Checking Up
The patent office has 12 divisions. Only three of them have more than 1,000 applications to their credit. Most of them have more than 2,000. The most minute details of new inventions have to be considered with those of hundreds of similar devices already patented. The process, which requires the greater part of the time required for a patent application, on Tuesday they announced the patent granted. New York, New Jersey and Pennsylvania are the most prolific of the states in the number of patent applications. The office of the division has been one of the most active in the past few months.

At the time the patent office was created, the main object of most of them being the perfection of a device which can rise into the air from a stationary position. A successful design for this type of airplane would eliminate the necessity for spacious landing fields and carry aviation terminals into the centers of population. A great many types have been patented.

A patent was granted on November 20 for a new lifting mechanism for aircraft, invented by George P. Wagner of New York city and assigned to the Air Line Transportation company of Philadelphia. It is in the form of either an airplane or a dirigible equipped with air nozzles for forcing air. The reaction of the air currents from these is said to lift the machine from the ground.

Mr. Wagner holds that with his mechanism the lowering of the plane also could be controlled by similar manipulation of the air currents caught in the nozzles of the craft's body.

An airplane helicopter invented by Walter I. Still of New York city was patented this month. It, too, is intended to replace the airplane as a power-controlled plane. It has two power-controlled parts, one on either wing, which are operated from the center of the body, part of the plane. The application was made by the inventor, but it is not yet clear whether it will be patented.

Interest in Aerodynamics
Aptly observed by persons now found in the patent office is the fact that the division of aerodynamics is the most active of the patent office. The division has received from the inventor a great many types of aerodynamic devices, but none have been patented.

The patent office has received a great many types of aerodynamic devices, but none have been patented.

Takes Much Water to Supply World's Cities

Have you any idea how much water the average city dweller uses daily? Take London, with its gigantic population. Here the authorities have to supply an area of 558 square miles, and give the 7,000,000 people the water they need. Would you have imagined that each of these demands no less than 36 gallons every day? Yes, that is only the average supply per head per day. In the dry, hot weather the amount required for each person becomes 40 gallons, or more than a barrel of water per day for each man, woman, and child. London is not the thirstiest town. Scotland consumes more water than England. In Glasgow and Edinburgh, for instance, the average consumption per head is not 36 but 37 gallons; and in London, in Pimlico, the consumption is 40 gallons per head. The thirstiest town in the world of the British Isles, here they take 81.7 gallons per head. One reason given for Scotland's large consumption is that the water supply is much better than in England.

Old Treasure Chamber in Westminster Abbey

Few who explore Westminster abbey are aware that there are many of its most ancient and interesting parts of which they have never had a glimpse. For instance, in the eastern cloisters there is a door so guarded against unauthorized intrusion that it can only be opened by seven keys, which are in the possession of the many government officials. Five of the keys are of this wood-rind door, which, by the way, is covered with human skins, are concealed from view by a stout iron bar which traverses it. This door gives access to a vaulted chamber, known as the "Chapel of the Pyx," the walls of which were standing as they stand today before even the Norman conqueror landed in Sussex. This chamber was once the treasury of England, to which were brought "the most cherished possessions of the state."

Civilization Wiping Out Eskimo People

Ottawa.—Like the dodo bird and the passenger pigeon, Canada's Eskimo people are gradually being wiped off the earth by civilization, according to officials here.

There are about 6,000 of them dwelling in the northern fastnesses of Canada, and all are especially susceptible to tuberculosis, grip, whooping cough, measles, chickenpox and other diseases introduced to the Arctic by the white man, but propagated there by the unsanitary conditions under which the natives live.

With the long range rifles supplied by the white traders, the Eskimos transform a natural wild life paradise into a land of famine.

One thing in the Eskimo's favor in his fight with new conditions is the fact that generally speaking he has no inherited craving for liquor.

Government officials hope early preventive measures may save this simple but admirable race from extinction.

Elephants' Feet Used as Champagne Tubs

Paris.—French champagne is creating a new craze in the world. The champagne tubs are used for storing champagne. The tubs are made from the feet of elephants. The tubs are used for storing champagne. The tubs are made from the feet of elephants.

His Wish for Snapshot Costs Life of Friend

Chicago.—Frank James, amateur photographer, wanted a good one because he was going to get it, but it cost the life of his friend. The friend was killed while taking a snapshot.

Prizes Horse 250,000 Miles With U. S. Mail

Phoenix, Arizona.—After carrying the daily mail over a route for more than twenty years, a horse named Alfred, sixty-five, retired with his own reward of having driven a distance equal to more than 250,000 miles. The horse was named Alfred.

First Fireplaces Were Wooden

Many of the first fireplaces were built of wood, and made of one on the inside with a sort of mortar. These early crude fireplaces were huge things, and originally it is from them we got our story of Santa Claus and the chimney. Certainly he would have had no difficulty coming down those early flues. In fact, they were provided with steps on the inside in order that the man of the house could patch the cracks in the plaster with new mud.—Successful Farming.

Getting Better and Better

The span of life lengthens. Our national diet becomes more rational, our public health work more effective.—Woman's Home Companion.

STATE OF MAINE

To all persons interested in either of the Estates hereinafter named.
At a Probate Court, held at Paris, in and for the County of Oxford, on the third Tuesday of January, in the year of our Lord one thousand nine hundred and thirty. The following matters having been presented for the action hereby ORDERED, indicated, it is hereby ORDERED:
That notice thereof be given to all persons interested, by causing a copy of this order to be published three weeks successively in the Oxford County Citizen a newspaper published at Bethel, in said County, that they may appear at a Probate Court to be held at said Paris on the third Tuesday of February, A. D. 1930, at 9 o'clock in the forenoon, and be heard thereon if they see cause.
Herbert H. Taylor, late of Bethel, deceased; Will and petition for probate thereof, and the appointment of Ellery C. Park as executor thereof, presented by Ellery C. Park, the executor therein named.
Lucinda H. Chase, late of Bethel, deceased; petition for the appointment of Benjamin W. Kimball, as administrator of the estate of said deceased, presented by said Benjamin W. Kimball, heir at law.
Frank Haggood, late of Bethel, deceased; petition for order to distribute balance remaining in his hands, presented by Ellery C. Park, administrator.
Witness, Henry H. Hastings, Judge of said Court at Paris this 21st day of January in the year of our Lord one thousand nine hundred and thirty.
43p ALBERT D. PARK, Register.

Department of Agriculture estimates world's beet sugar crop for 1929 at 9,866,000 tons.

NOTICE OF FORECLOSURE

Whereas Brownie Belskis, of Bethel, County of Oxford, State of Maine, by his mortgage deed dated September 4, 1924, recorded in said Oxford County Registry of Deeds, Book 246, page 246, conveyed to me, the undersigned, a certain parcel of real estate in said Bethel in part and in part in said County, and bounded as described as follows: Being a portion of the farm formerly or sometime known as the Preston F. Thomas farm and being that portion of said farm lying on the easterly side of a line beginning at the northwest corner of said so-called Thomas farm and running thence along the course of a boundary fence between said so-called Thomas farm and the farm formerly owned by Otis Wyman, and continuing along the same line as the boundary fence to the rear of the homestead of said so-called Thomas farm and above bounded from said premises to said Belskis, dated on said September 4, 1924. Said premises being the premises and real estate named and conveyed to said Belskis by the said mortgage deed, and the condition of said mortgage has been broken; now the undersigned, the mortgagee, claims a foreclosure of said mortgage.
Dated January 21, 1930.
Otherwise A. R. Mason, Justice of the Peace, State of Maine, January 21, 1930.
Subscribed and sworn to as by and for said A. R. Mason, otherwise R. Mason.
Before me,
ELLERY C. PARK, Register.

Entered as second-class matter, July 1, 1925, under Post Office No. 107, at Bethel, Maine. Post Office at Bethel, Maine, authorized to collect postage. Paid at Bethel, Maine, January 30, 1930. Acceptance for mailing at special rate of postage provided for in Act of October 3, 1917, authorized on January 30, 1930. Postmaster: J. H. Hastings. Second-class postage paid at Bethel, Maine, January 30, 1930. Postmaster: J. H. Hastings.

ONE of the finest stories from the pen of an author exceptionally gifted in depicting romance and reality in the Canadian north. It concerns mainly three people and the incidents occur in one of those quaint villages far back in Quebec where the Eighteenth century is almost as much in evidence as the Twentieth.

Eggs by Fiat

They are still finding it difficult in Russia to provision the industrial centers. It is mostly, of course, the fault of the peasants. . . . Commissioners and communists must step in and teach them their business, says the London Times. Three months ago they said: Let there be rabbits, rabbits in millions, gadgrees rabbits, canned rabbits, rabbit literature, rabbit films, rabbit propaganda, rabbits, confusions and all concerned get to work with a will, but the rabbit scheme is not to mature till 1933, and meantime one must eat. So how is it to be hoped: hens on a "pan Soviet scale"? A deputy-commissioner very properly named Khinchuk has issued the fiat: the commissariat of agriculture has organized the scheme. The results are sure to be impressive. When the hens of Khinchuk chuck-chuck in their millions over their billions of eggs in the "controlled nests," then will Khinchuk chuckle, and the eyes and other portions of good Bolsheviks swell with fatness.

When a dog proclaims its ownership you may take its word for it—or its wag, its smile, its joyous recognition, to be more specific. Recently another dog, a "human" dog named Sam, was recovered from a thief because the dog identified its owner to the satisfaction of the police. Human witnesses may perjure themselves, they may be in doubt. Even when they speak knowingly and truthfully they sometimes are suspected. A horse has no way of telling us unmistakably who is his master. A cat is either indifferent or is fickle in its attachments. But a dog makes no mistakes in recognition and his demonstration is beyond question. Even if he has been abused and should disown his master, he nevertheless is true. His is a language of affection, an expressive, convincing language.

Of the 15,115,000 bags of coffee exported from one country alone in 1927 more than half came to the United States. And of that half about a third came on the table mouse-colored and semi-solid at the bottom of the cup.

 13. Mt. Everest.

JAMES RUSSELL LOWELL SAID:

"When the microscope search of scepticism which has hunted the heavens and sounds the song to disprove the existence of a Creator, has turned its attention to human society, and has found a place on this planet."

ten miles square, where a decent man can live in decency, comfort and security, supporting and educating his children unspoiled and unallured; a place where age is respected, infancy respected, manhood respected, womanhood honored, and human life held in due regard,—when sceptics can find such a place ten miles square on this globe, where the Gospel of Christ has not gone and cleared the way, and laid the foundations and made decency and security possible,—it will then be in order for the sceptical literate to move thither and ventilate their views. But as long as these very men are dependent upon the religion which they discard, for every privilege which they enjoy, they may well hesitate a little before they seek to rob the Christian of his hope, and humanity of its faith in that Savior who alone has given man that hope of life eternal, which makes life tolerable and society possible, and robs death of its terrors and the grave of its gloom."

The above beautiful lines were sent by Dr. and Mrs. J. G. Gehring and read in response to their names at the roll call of the First Congregational Church on Wednesday, Jan. 29.

WEST BETHEL

Miss Madiya Bell returned to South Paris Saturday after a week's visit with her parents.

Miss Helen Horton of Locks Mills spent the week end with Mr. and Mrs. Carroll Abbott.

Miss Laura Hutchinson has been confined to her home with a cold.

Mrs. Earl Jordan of Auburn was a guest of Mrs. Estella Goodridge over the week end.

Mr. and Mrs. Carroll Abbott were in Portland for Sunday and Monday.

Mr. and Mrs. Arthur Browne of Auburn were the guests of N. M. Scribner Sunday.

Mr. and Mrs. Hollis Hutchinson spent Sunday with Archie Hutchinson and family.

Mr. and Mrs. Paul Head visited in Andover Sunday.

Lelan Mills, who has been working in Gilsum, is home with a cold.

The thermometer reached its lowest degree this winter on Monday morning when it was 24 below zero.

Mrs. Byron Abbott of Portland was in town Tuesday, calling on friends.

Clarence Bennett was in Lewiston Tuesday.

R. L. Martin visited his nephews, Irvin and Charles Martin, Sunday.

GREENWOOD CENTER

Mr. and Mrs. William Morgan and family from Bryant Pond visited at Daniel Cole's over the week end.

Betty Hall, who has been quite ill with tonsillitis, is a little more comfortable at this writing.

Mrs. Roy Wardwell was in North Waterford Friday.

W. B. Cummings called at J. A. Kimball's Saturday.

Frederic Scribner was home over the week end from Norway High School.

Graphic Outlines of History

SCHOOLHOUSE WHERE NATHAN HALE TAUGHT

About one hundred and fifty years ago, Nathan Hale, one of America's immortal heroes, left this small schoolhouse, where he was teaching, to fight for his country. He served under Washington as a spy, and was caught by the enemy while trying to learn their plans. He was executed and thereby won immortality.

Devoted service, marked by sympathy and efficiency, is characteristic of our institution.

Day and Night

Held as Sacred by the Ancient

According to legend St. Patrick, Ireland's first Christian missionary, is said to have used the shamrock to explain the Trinity. The shamrock is a plant with three leaves growing from one point. It is called "shamrock" and is applied to plants having three leaves. The word for three-leafed shamrock is "shamrock." While the shamrock has been applied to plants, it is generally considered with one of the purulent clover has long been used with various superstitions. It is in the form of a shamrock that the reason for attributing uncanny powers to it, regarded as sacred long before the time of St. Patrick, is the person carrying it the power of detecting evil spirits or would-be evil undertakings. Under his pillow he slips it, unseen, to his lover, assure him of Snake Venom.

Probed by Science

It has been stated on authority that snake venom is a cold-blooded animal's blood. Frogs, toads, lizards, systematic observation is not the case. Toads are tenacious of life, have survived three days after being bitten by rattlesnakes, but in the end the frogs often die almost immediately after having been bitten. An envenomed snake of the same species does not die. Though good in some cases, however, in others it is a deadly foe. Put-adders are immune from one another. On the other hand, that have been bitten by manbats, boom-slugs, venomous South African snakes, and not always with a put-adder which with enough cobra poison men survived.

Electron and Molecule

electron is the smallest of electricity. It may be of negative. The atom is the smallest unit of any chemical molecule is the smallest any body can be divided into. It is identical with the atom of mercury or argon. It consists of the union of more atoms. According to theory all material substances are composed of atoms of a certain number of kinds, and of the same kind being of different weight and other properties. The atom is to be conceived as a complex system whose complexity is in rapid orbital motion.

The Winner

was in the habit of turning up at the same restaurant called the waiter to him. Instead of tipping you he was going to give you a lump sum at the end of every month. It was convenient for me." "But I wonder if you'd come in advance for this month, that's a strange request, here's \$5. I suppose you'll hard up." "No, sir!" smiled John, slipping the money into his pocket. "Only here today."

Long-Lived Poets

on the whole, are a long-lived lot. "Looker-on" is the title of a chronicle, and some recalled of poets laureate in office since the time of the first have reached a good old age. For instance, lived Sir William Davenant eighty-three, and Geoffrey Chaucer eighty-six. The average of laureateship has been years. Southey held it years, and Tennyson for years.

The Word "Anecdote"

we know that the word simply refers to a piece of any incident, usually a vivid narrative. Finally, however, an anecdote is a short story of an incident, a story of unpublished events, hence being indicated by source. In this sense that it is a story of the private life of Justus Theodora.—Kansas City Star.

Get in First and Last Word

scramble of the species act in the first and last word of the magazine. The girls learn to talk six weeks before the boys, while recent statistics show that women live longer. Of the 46 centenarians there last year, 30 were women. The female deaths were more numerous, showing that men pass eighty than women.

Held as Sacred**by the Ancient Greeks**

According to legend St. Patrick brought the doctrine of the clover to Ireland. Then one day he saw a tiny plant growing at his feet. He picked it up and used it to illustrate the doctrine of the clover. It is applied to the plants having three leaves. In the word for three-leaf plants "trifolium." While the name shamrock has been applied to various plants, it is generally used to mean the clover. Shamrock has long been used with various superstitions. It is in the form of a cross, regarded as sacred by the long before the time of Christ. Shamrock has been believed to have the power of detecting the presence of evil spirits or would be successful in his undertakings. If he under his pillow, he would find his beloved and a maiden by slipping it, unseen, into the hand of her lover, assure him a safe journey.

of Snake Venom**Probed by Scientists**

It has been stated on apparently reliable authority that snake venom will kill cold-blooded animals, such as snakes, lizards, and toads, and that systematic observation shows that it is not the case. Toads, which are tenacious of life, have been known to survive three days after being bitten by puff-adders or snakes, but in the end they succumb. Frogs often die almost instantly after having been bitten. Again, it is said that the venoms of two snakes of the same species do not affect each other. Though this is true in some cases, however, it is not true in all. Puff-adders appear immune from one another's venom. On the other hand, puff-adders that have been bitten by mambas, boom-slans, and venomous South African snakes usually die, but not always. In one case a puff-adder which was bitten with enough cobra poison to kill a man survived.

Electron and Molecule

The electron is the smallest known unit of electricity. It may be either of positive or negative. The atom is the smallest unit of any chemical element. A molecule is the smallest part into which any body can be divided without destroying its substance as such. It is identical with the atom as a unit of mercury or argon. It consists of the union of two or more atoms. According to the theory all material substances are composed of atoms of a comparatively small number of kinds, all of the same kind being uniform in weight and other properties. The atom is to be conceived as a complex system whose component parts are in rapid orbital motion.

The Winner

was in the habit of lunching at the same restaurant. One day he called the waiter to him and said, "I am going to give you a lump sum of money every month. It will be convenient for me." The waiter answered, "But I wonder if you'd mind me in advance for this month?" "Oh, that's a strange request. How much?" "I suppose you are hard up?" "No, sir," smiled John, slipping money into his pocket. "Only I'm here today."

Long-Lived Poets

On the whole, are a long-lived lot. "Looker-on" in the Literary Chronicle, and some records called of poets laureate. Of the office since the time of Bonaparte have reached a good old age. The average tenure of poets laureate has been over 70 years. Southey held it for 45 years, and Tennyson for forty.

The Word "Anecdote"

As we know that the word "anecdote" simply refers to a pithy account of any incident, usually a short, interesting narrative. Finally, however, an anecdote is a secret history, a sort of a history of unpublished events, this meaning being indicated by its source.

In this sense that it is used, however, by Procopius in his history of the private life of Justinian the Great. —Kansas City Star.

LOCKE MILLS

Mrs. Tena Woodsum is in poor health this winter. William Mason, who has been on the sick list, is able to resume his work at the mill. Miss Glenyce Cole has returned to Portland after a short stay with her parents, Mr. and Mrs. L. E. Cole. B. R. Billings of Bryant Pond was in town Friday. Mrs. Ralph King, Lucille and Corinne have been the guests of Mrs. Clara Brown recently. H. N. Bragdon of Bethel was in town Thursday. Leslie Davis of Bethel was in town on business Tuesday. Two teams have been organized for spelling contests at the grammar school. Elizabeth Morgan was elected captain for "Old Ironsides" and Avis Sills captain for the "Blue Winners." "Old Ironsides" won in the contest Monday afternoon, and the losing side gave them an entertainment Tuesday afternoon. Refreshments of home made candy were served. Miss Bertha Kimball, who has been working for several months in Portland, is staying with her parents, Mr. and Mrs. Wenhly Kimball. Herbert Ring of Bryant Pond was in town Friday. Clifton Swan has purchased a radio. W. B. Rand, who has become a member of the I. G. A., held his opening sale Saturday. Flora M. Swan is working for Mrs. Leslie Davis at Bethel. Mary Martin and Carolyn Towle of Bryant Pond called on friends in town Saturday. Mrs. Cora Bennett has been helping care for her mother, Mrs. Morgan, who is ill at Greenwood City. Rev. A. K. Fillmore of Bryant Pond was a guest of friends in town a few days last week. Mr. and Mrs. H. E. Day were the winners of the box of chocolates in the prize dance Saturday night.

SOUTH WATERFORD

Mrs. Will Marr, who slipped on a piece of ice while hanging out clothes and prained her ankle, is gaining. Mrs. Jennie Hammond is visiting her niece, Mrs. Chester Tarbox, in Harrison. Mrs. Fannie Green has been visiting her sister, Mrs. Laura Shaw, on Blackguard. Forest Kilgore, who attends South Paris High School, was sick last week, but was able to spend the week end with his parents. Orla and Murray Brown, the electricians, are back in Waterford doing some work on the lines. They are boarding at Will Green's. Arthur Kittredge is working for John Muller. Mrs. Marjorie Kingman visited in South Paris last week. Clayton Pike has installed several radios lately. Mrs. Charles Chaplin got 20 eggs from a flock of 22 Rhode Island Red pullets one day last week. Freeman Chaplin has a pet woodchuck and one day last week Mr. Woodchuck awoke from his long winter's nap and partook of a little nourishment. This may be a sign of an open winter. There was a good attendance at the Grange meeting Saturday. The oyster dinner served by the brothers was certainly a credit to them. In the afternoon a fine program was presented by the lecturer, Annie Bradbury. The next meeting will be an afternoon meeting, Feb. 8. A spelling match is scheduled for this meeting.

Maine Industrial Review

Skowhegan—Office of American Railway Express Agency moved to quarters in Maine Central Railroad passenger station. Portland—Remodeling of Union Mutual building completed for occupancy by Maynard S. Bird & Company, investment bankers. Rockland—Two regular sea plane taxi services will be inaugurated on Maine seacoast in near future. Togus—Bill introduced in Congress for construction of \$150,000 hospital building in this town. Naples—Bay of Naples Inn sold to Bay of Naples, Inc., of New York, for consideration of \$75,000. State Highway Commission authorized survey of proposed relocation of State Highway No. 1, between Spear's Hill and Yarmouth. Skowhegan—Candlepin factory will start operations in former brass and iron foundry on McClellan Street. York Village—York County Trust Company sold to Financial Institutions, Inc. Standish—New annex to Standish High School building recently dedicated. Portland—\$100,000 bought to extend dormitory space at local Y. M. C. A. building. Bradley—Plans under way for establishment of \$2,000,000 radio station here by American Tel. & Tel. Co., for relay of transatlantic radiograms and radio telephone messages.

Fore Street, Oxford

A daughter was born to the wife of Al Twitchell, Jan. 25. She has been named Ruth Chestina. Mrs. A. D. Cummings is home from the hospital and is quite comfortable. She is able to receive callers. John Grover has a new Chevrolet truck for winter use, as he does a trucking business. Mrs. Verna Callahan is in Norway nursing at present. Mrs. Leroy Bryant of Hartford is caring for Mrs. Al Twitchell and baby. Irwin Cummings, son of A. D. Cummings, who was working in Florida, was called home by the serious illness of his mother. Miss Chestina Twitchell attended the supper and entertainment at the Norway grange hall last Thursday evening. Good reports come weekly from Mrs. Flora Cummings, who is still in Auburn. She reports walking a mile daily. These cold mornings find her out walking. Mrs. Howard E. Tyler spent Thursday with Mrs. Ernest Mattor.

WEST GREENWOOD

Billy Daniels of Paris Hill spent several days with her grandfather, Will Twitchell, last week. Some cold weather is reported here last week as some thermometers registered as cold as 30 and 32 early in the day. Good winter weather. Mrs. W. C. Cross on Howe Hill called on her daughter recently. Annie Cross called on Mrs. Lillian Lapham one evening last week. Paul Croteau and Ray Thompson were in town recently. Mr. Bradford called at W. C. Holt's Saturday. Everett Cross is working at Locke Mills. Arthur Cross was in this vicinity recently. Rodney Cross called on his grandmother at Locke Mills Sunday. Mrs. Cole called on Mrs. Bradford recently. J. M. Harrington spent Sunday at his home. Miss Bean spent the week end at

her home. Perley Hadorkin is working for Tom Kennagh. Parker Rainey was in town recently.

HANOVER

Linwood Fogg of Norway visited friends in town recently. Mrs. Minnie Thompson, who has been sick the past week, is able to be out on the street once more. Two games of basketball were played at the Hall Friday evening, the C. A. A. against the Stephens Juniors, and the C. A. A. against the Sophomores, the C. A. A. winning in each case. Mishemokwa Temple held its regular meeting Friday, all officers were present to entertain and serve refreshments. Twenty members were present. Clement Worcester, James Hayford, Elwood Richardson and the Saunders family attended the Gould-Stephens game at Rumford. A very able sermon was delivered by Rev. Mr. Edwards Sunday afternoon at the schoolhouse. All are cordially invited and it is hoped there will be more out next Sunday.

NORTH BETHEL

D. S. Curtis of Bridgton was in town Tuesday. Miss Hope Wheeler spent the week end at her home at West Bethel. Roland Fleet has finished cutting ice. Ramsey Reynolds and Gene Thudlow have been helping him. Mrs. Alfred Hobbs was a visitor at Mrs. C. O. Demerit's, Bethel, this week. Success is a good idea plus a lot of hard work and patient concentration.

The Running Sap

By GENEVRA COOK

(Copyright)

SPRIGGINS earned the money for his college education in the sugar camp, where the sap running all the time. He came up here as a freshman with a green and red plaid jacket, a weathered complexion, and a bluish red and yellow hair.

He went out for freshman football just couldn't seem to hang the ball. Guy Wise, who was a more, lent him a derby and told him to carry it around with him. He did for a week, clutching it. Hank couldn't remember either. He used to go round muttering: "I-7-4-2—like—"

He was at the sophomore-freshman football game that night. He was wearing the same plaid jacket. He was with Helen Aull. That night that Guy Wise and his brother, Herbie Auby, played Hank. Hank's face redder than the red plaid jacket. He was with pride, showed Helen the red plaid pin which they had. Hank, utterly unconscious of the fact that his plaid jacket was the same as the one that Helen Aull wore that night, too, that the plaid jacket was Helen's. Hank, they said, was an athlete of the institute for the and had been found the week with his throat cut open from ear. The room was in utter darkness when Herbie Auby told him to the shuddering froth. As the tones of his voice whispered words, there slithered in a white figure with a crimson across its throat. There was a of terror, the crash of a chair, and a gasping, shrieking burst through the room and the nearest door. When the dashed on, the corpse was gone, and was Hank Spriggins. He did appear again that night, and Helen would not promise.

He told you one thing, though, "I tell you one thing, though," he said softly. "If that sap Hank gets into the game, all you do is yell 'Christy's Corpse' and he'll drop the ball like a potato." For any woman who to go home alone is like Helen.

Friday was one of those days for football and fall week. Hank was early on the field; he hadn't told him not to come. He was provided and on Hank ranked 21. So he sat at the far end of the bench and watched his team fight back the onslaughts of Bull Bitter and Panchertown Pounders. At the third quarter the score was 0-0.

In the last quarter opened there only three cub remain on the field. Two men beside Hank were bench Bull Bitter and his gang. After a tough line rush and substitutes were taken out. Hank sat on the bench.

Ball was on Hickory's fifteen, third down, two yards to go. Panchertown was dead set on crash. With all his strength Bull Bitter himself into the line plunge. The heap was untangled, the ball seven inches short of the line. Hank Stoppam was sitting on the ground with his ankle turned on.

In there, Spriggins, gasped. "Here, one of you guys in a shirt." The jersey hit the head; as he dragged it off, he looked for the jersey. It was 13.

Hank, a little bewildered, across. Bull Bitter marked him for.

Hank crouched low for the signal. "21" barked Howie Callahan. "1-5-4-13." At the number Hank automatically into the air as his number. He'd have to ball. It was a forward pass. It sailed over his head. Hank great leap into the air and down with it clutched in his hand. The crowd roared. Bull Bitter cutting across the field. Hank. He was behind him.

shrieked in his ear. "Christy's Corpse!"

With one yell Hank fled down the field, clutching the ball because he had nothing else to cling to. Bull Bitter panted behind him; as those pursuing footsteps sounded louder, Hank clung closer to the comforting ball, shrieked to the heavens, and ran faster. When at last his pursuer felled him, he was over Panchertown's goal line.

The stands went wild. And as Hank was borne grandly off the field he looked down at the girls who sat, worshipping, in the bleachers. Among them, and without the escort of Bull Bitter, sat Hank's co-ed. From his seat on the top of the world, Hank waved his hand at Helen Aull.

They Do That Very Thing
Too many of our benighted look im promptly—as if they were made up as they went along.—Lafayette-Journal and Courier.

Lead Absorbs the Shock

In the construction of a skyscraper in New York city, 55 tons of lead was utilized in protecting the steel from shock, which also means that the comfort of the occupants has been taken care of. The metal is made use of in the form of a mattress between the steel and the foundations.

Scottish Abbey Holds

Relics of Robert Bruce

Subject to the fulfillment of certain conditions, the trustees of Professor Noel Paton handed over the following articles to the Kirk-session of Dunfermline abbey: 1. A portion of the skeleton of King Robert the Bruce, namely, the metatarsal or bone of the great toe. 2. A small portion of the outer leaden shroud of King Robert the Bruce. 3. A small portion of the tollie d'or in which the body of King Robert the Bruce was wrapped. 4. The remains of one of the iron nails which were found among the remains of the coffin in which the body reposed. 5. The remains of one of the six iron rings, or rather handles, which had been filled in with lead into the largest of two stones protecting the vault of the Bruce when first discovered on February 17, 1818. 6. Twelve fragments—white marble and calc stone—believed to be portions of the magnificent monument of King Robert the Bruce at Dunfermline destroyed by the Lords of the Congregation. The relics are preserved in an oak glass-fronted cabinet placed alongside of the abbey pulpit erected immediately above the vault of the Bruce.—London Mail.

Washington Stirred Up

Over Van Buren's Coach

Van Buren arrived in Washington toward the end of the second week of the session, it being traditional for the Vice President to absent himself until the senate committee had been appointed. On taking the chair on Monday, December 16, he made his first public utterance as the second officer of the land. It was short and one such as others before and after him have made; totally devoid of significance. It provoked no comment; but the coach he had brought over from England did. The adverse journal described it as an English coach of state—"a very splendid carriage, drawn by two beautiful blooded horses, their heads and tails full of a great deal more of intellect, passion, feeling and sublimity than their owner. . . . It is of a dark-olive hue, with ornaments elegantly disposed, shining as bright as burnished gold" and "far more superb than the equipages of royalty."—From "An Epoch and a Man" by Dennis Tilden Lynch.

Cheerfulness Wins in

Life's Strenuous Game

Cheerfulness is a wonderful tonic. If you are enjoying yourself thoroughly, how much you can do. It is hard to fire out a happy person. It has been proved, too, that gloom is wearing. You can exhaust yourself worrying and while you are lying about and not moving a muscle. If you worry, you seldom do good work, because you have not energy enough to go around. You use it up in worry, and there is not enough left for your work. It follows logically that if you wish to make the most of life, you must cultivate cheerfulness and discard gloom. If you forget your trouble in laughing some one else, however, you can find that you can always put gloom to flight and get the mastery of fate. It is your only chance for happiness.—Exchange.

Indian Ruler Famous for Astronomical Study

There lived in India, in the Seventeenth century, a ruler known as Maharajah Jal Singh II, and being keenly interested in astronomy he evolved a series of structures which, though not now used for practical purposes, constitute the most unique astronomical instruments in existence. He appears to have collected all kinds of astronomical books, and sent some workers to foreign countries to gather information. Having determined the kind of instruments required on which to make the necessary recording of the movements of the heavenly bodies, he selected five places in India as the centers in which the observations should be taken. The first he built at Delhi, and then others in Jaipur, Ujjain, Benares, and Mathura. The observatories in Delhi and Jaipur have been carefully restored. In addition to a number of metal instruments he erected large masonry instruments, some of them as high as 90 feet. Very careful records were made of the observations of his staff of workers, and modern astronomers have expressed surprise at the valuable information thus collected. The ruler responsible for these interesting instruments died in 1743 and his wives, concubines and sentence expired with him on his funeral pyre.

Falls of Niagara as

Pictured by Hennepin

Father Louis Hennepin saw Niagara when he went West to the upper Mississippi with La Salle's expedition in 1679. He had a poor eye for distances, for in successive narratives he measures Niagara's height as 500 and 600 feet, instead of its maximum of 162, but he had a flair for vivid word pictures: "Betwixt the Lake Ontario and Erie there is a vast and prodigious cataract of water which falls down after a surprising and astonishing manner, in form that the universe does not afford its parallel. This true Italy and Switzerland boast of some such things, but we may well say they are but sorry patterns when compared to this of which we now speak. . . . It (the River Niagara) is so rapid above the descent that it violently hurries down the wild banks while endeavoring to pass it to feed on the other side, they not being able to withstand the force of its current, which inevitably casts them down headlong above 600 feet. . . ."—New York Times.

From Bad to Worse

A rich old Chinese mandarin had two wives. Said the first to him one day: "I wish you had not so many gray hairs. People jeer at me and call me an old man's darling." "In that case, my dear," he said, "I will pull them all out." And he did so. Shortly afterwards his second wife came to him complaining that now he had only black hairs on his head, she looked, by contrast, a horribly old woman. "Don't worry, my dear. I will pull them out," he said soothingly. But when he had pulled out all the gray and all the black hairs the mandarin was completely bald. And neither of his wives would have any more to do with him.

ROWE HILL, GREENWOOD

The sick in the neighborhood are all improving. Winifred Bryant, Carl Brooks, Ethel and Glenwood Libby all returned to high school Monday morning.

Mrs. Mabel Dunham went to Greenwood City one day last week to call on her mother, Mrs. Lyle Morgan, who is very feeble.

Miss Carolyn Towle visited Miss Mary Martin at Greenwood Centre over the week end.

Those having 100% in school for the week ending Jan. 24 are Vera Dunham and David Libby.

Clude Dunham is cutting lumber on his lot here. Edgar Dunham is helping him chop.

Wilmer Bryant is hauling long lumber to Mann's mill for Clyde Dunham. Vera Dunham visited Norma Ring at Bryant Pond last Saturday.

Callers at Newton Bryant's Sunday were: Mr. and Mrs. Durward Lang and son Merle and William Morgan of Bryant Pond.

Mr. and Mrs. Theodore Dunham were at Elton Dunham's Sunday.

Mrs. Abbie Hayes called on Mrs. Margaret Bryant last Friday.

GREENWOOD CITY

Mrs. Maude Cole has returned to her home at Portland.

Robert Morgan was in Bryant Pond on business recently.

Edna Swan of Locke Mills is visiting her aunt, Mrs. Robert Morgan. Maude Cole of Portland is with her sister, Mrs. Roland Hayes.

Mr. R. B. Morgan and daughter Fay spent the week end with relatives at West Paris.

Frank Curtis of Yarmouth was at his home for the week end.

Heating and Plumbing

NORTH PARIS

The schools reopened Monday after a one week vacation with the same teachers.

R. R. Whitten of Welchville is having moving pictures at Community Hall every Wednesday evening.

Mrs. Nina Felt of Norway visited her daughter, Mrs. Floreston Pierce, Sunday.

Clarence Coffin of East Sumner spent the week end with his parents, Mr. and Mrs. S. E. Coffin.

Ethelyn Gibbs, who has employment at South Paris, spent the week end with her parents, Mr. and Mrs. James Gibbs.

The youngest child of Mr. and Mrs. Charles Ridley got burned quite badly Saturday by tipping a teapot of hot tea onto himself.

Rather Balentine went to South Paris Sunday evening where she will assist Mrs. H. D. McAllister with her housework.

Mr. and Mrs. George Blake and son

Everett of Berlin, N. H., were guests of Mr. and Mrs. W. H. Brown Saturday.

Dr. Kay of West Paris and Mrs. Charles Ridley took her son George to the C. M. G. Hospital Thursday for treatment. Mr. Ridley is confined to the house with illness which makes three sick in the family at present.

Floyd Hart of Wilson Mills was home over the week end.

The sick: Mrs. B. C. Lowe, Mrs. Geo. Noyes and Mrs. James Ripley, remain about the same.
